

C5 Medical Werks Achieves ISO 13485:2003 Certification

New company quickly complies with stringent international standard for medical manufacturing.

April 21, 2006 – Grand Junction, Colorado – C5 Medical Werks, a supplier of technical ceramic components for implantable devices, today announced its official certification to ISO 13485:2003. After an intensive effort, C5 Medical Werks received their certificate for the standard from international registrar BSI on April 13, 2006.

The ISO 13485:2003 certification is internationally recognized by governmental and industrial bodies for the design, development, production, and continuous improvement of medical devices and components. This certification allows C5 Medical Werks to compete on a global level and meet the demanding needs of the medical device industry.

“Our group has worked diligently to achieve this mission-critical certification in record time,” states Brad Coors, President of C5 Medical Werks. “We are committed to making the highest quality
