

Brad Coors to Present C5 Medical Werks at Boston Medical Device Summit

Executive networking conference focuses on early-stage medical technology companies.

DENVER, CO (July 12, 2007) — Brad Coors, Founder and President of C5 Medical Werks, a wholly-owned subsidiary of CoorsTek, will address the Medtech Insight In³ Medical Device Summit to be held in Boston on October 3-5, 2007. In³ Summit conferences provide strategic partnership, healthcare investment and networking opportunities for the country's top medical technology decision-makers.

"Investment in Innovation East," like its West Coast counterpart which Coors addressed earlier this year in San Francisco, will feature previews of early-stage medtech companies. Arranged in three focused tracks, Coors will present C5 Medical Werks to the spine and orthopedics track, showcasing the company's innovative, advanced ceramic solutions for ceramic spinal implants, ceramic hip replacement implants, ceramic dental implants and other custom ceramic implantable components.

“C5 Medical Werks fills the need for a highly technical, quality certified, customer-oriented source of manufacturing for the medical device industry,” says Coors. “Drawing on nearly 100 years of technical ceramic expertise, we are taking a leadership position in producing the highest quality legacy products and prototyping of next generation ceramic implant technologies.”

The company’s state-of-the-art manufacturing facility in Grand Junction, Colo., provides advanced materials development, forming technologies, firing equipment, precision finishing and precision measuring equipment that allows the company to meet the highly specialized demands of implantable device manufacturers around the globe. C5 can also assist with navigation technologies and future implants, which will transmit data related to wear, stress loads or positioning. Looking to the future, plans are underway to offer a variety of non-implant components, such as sheer valves, piston and cylinder assemblies, cauterizing instrument tips, x-ray vacuum tubes, microwave stations, electrosurgical tips, high intensity lamps and robotic surgical instruments.

About C5 Medical Werks

C5 Medical Werks is a leading provider of ceramic solutions for the medical device industry. The company’s capabilities include state-of-the-art

manufacturing equipment, specially formulated ceramic materials and a comprehensive quality system – including certification to ISO 13485:2003. Product lines include ceramic implantable components to be used in hip, spine, and dental applications, as well as other potential custom implant components. C5 Medical Werks excels at manufacturing premium implantable components that help people live better lives.

C5 Medical Werks is located at 2451 River Road, Grand Junction, CO 81505. For more information, please visit www.c5medicalwerks.com or call (877) 259-3757.
