

C5 Medical Werks Reaches Million Mark in Components Shipped

Global provider of ceramic implantable components surpasses projected goals

July 29, 2008 – Denver, Colorado – C5 Medical Werks, a manufacturer of high-quality ceramic solutions for the medical device industry, announced today that, in June 2008, the Company shipped its one millionth ceramic implantable component based on unit shipments to the orthopaedic, brachytherapy and electro-implantable market segments

The Company's state-of-the-art facility, located in Grand Junction, Colo., produces ceramic components and assemblies for hip and knee joints, motion preservation/total disc replacement components used in spine surgery, as well as seeds for brachytherapy. Additional medical grade ceramic implantables include crowns, bridges, abutments and implants for dental applications and electro-implantable devices such as cochlear implants, neuro-stimulators and neuro-sensors. Combining a medical grade quality system and advanced technical expertise with a customer-centric business philosophy, C5 Medical Werks is recognized as a leading supplier of ceramic components to the medical device industry.

"Reaching this level of productivity in 2008, places us in an excellent
